

Global maritime satellite voice service

FleetPhone is the first global maritime satellite voice service from Inmarsat. It delivers clear voice quality, circuit switched data and SMS messaging communications.

Simple to install and use, it connects to existing phone systems making it easy for captain and crew to make calls at anytime.

FleetPhone is ideally suited for the marine transportation, commercial fishing, leisure, maritime offshore and cruise segments.

It brings additional security onboard with the 505 emergency calling feature, while our solutions optimize the service with cost-effective tools for your daily communication and administration needs.

Applications

FleetPhone is suitable for maritime specific applications:

- Dedicated equipment for crew calling.
- Universal Card™ for crew prepaid private calls.
- PABX integration.
- Captain's private line.
- 505 emergency calling service.
- Piracy safe room and dedicated lifeline onboard

KEY BENEFITS

- Clear voice service (2.4 kbps).
- Messaging: text-to-text, text-to-email, web message to FleetPhone.
- Circuit-switched data (up to 20kbps) with SkyFile® Mail compression.
- Single and multi-user capability: connections of up to 5 standard phones or integration to a PABX system.
- Reliable, cost-effective terminals and antennas; easy to install.
- Global coverage on Inmarsat's I4 network.

Innovative solutions for your needs

Our solutions are innovative value added services designed to enhance satellite connectivity. To help you get more from your FleetPhone, we offer a number of solutions:

Efficient online business tools: control and monitor SIM cards and traffic using The Source®, our web based information management system.

Versatile messaging service: SkyFile® Mail saves time and money by compressing emails, e-faxes and SMS by up to 90%. It includes a crash recovery function, antivirus and an anti-spam filter.

Cost-effective Fixed2Mobile calling: using Satellite Direct® and Satellite Direct Plus®, place calls from any landline or wireless phone to any mobile satellite terminal, including your FleetPhone at a price more affordable than standard landline charges.

Robust terminals and antenna

The FleetPhone service is available through two terminals:

The Oceana 400 is a simple and cost-effective below-deck unit which features a RJ11/POTS interface, enabling 5 standard phones or integration to a PABX system - an ideal solution for crew calling.

The Oceana 800 is an all-in-one terminal, with integrated Bluetooth, LCD display for phonebook and SMS, an active privacy handset, and built-in speakerphone. It features an integrated GPS receiver providing tracking and instant messaging reporting via SMS.

The two terminals work with the omni-directional BEAM Active Marine antenna ISD710, a compact and lightweight device of less than one kilo that provides a high quality marine enclosure with a solid mounting bracket.

Specifications	Oceana 400	Oceana 800
